

# Enjoy better health with Entek® Water

## RO Drinking Water System With Quick Change Cartridges

**No service calls needed simply to change out cartridges and membranes!**

Better health . . .  
Better taste . . .  
Better on your budget  
without bottled water!

Say "NO" to bottled water!

### RO systems remove:

- Lead
- Mercury
- Trihalomethanes
- Nitrates
- Sodium
- Arsenic
- PCBs
- VOCs
- Fluoride
- Harmful chemicals
- Chlorine
- Tastes
- Odors
- Total dissolved solids
- Particulate and more!

### It's a six step process:

1. Pre-filtration for sediment, silt, rust particles and other particulate.
2. Pre-filtration to remove chlorine, chemicals, taste and odors.
3. RO membrane filtration to remove harmful contaminants in solution..
4. Water flows to the storage tank so it is readily available when needed.
5. When processed water is needed, your water flows through the post-carbon cartridge for final polishing for improved taste.
6. Great tasting, processed water is provided from the dedicated chrome faucet, conveniently mounted by your kitchen sink.

---

## Three stage "Ultra Filter" with UF membrane

### Removes:

- Chlorine
- Taste
- Odors
- Bacteria
- Cysts
- Sediment
